

Aurin On-Off Kit

The AURIN On-Off Kit (Dialysis Procedure Kit) is a pre-packaged, sterile, all-in-one solution designed to facilitate both the initiation ("On") and termination ("Off") phases of a hemodialysis session. By consolidating all necessary components into a single, sequential blister pack, it helps clinical teams minimize contamination risks, reduce preparation time, and maintain strict aseptic techniques for every patient, every time.

All-in-One Sterile Kit

Reduced Contamination Risk

Faster Preparation

Features

- Consolidates all necessary components into a single blister pack
- Sequential layout supports strict aseptic technique
- Reduces preparation time for clinical teams
- Pre-packaged and sterile, ready to use
